

The ACS 1962 Prize

The ACS 1962 Prize recognises and encourages excellence by annually awarding a prize to the best student completing an undergraduate degree in the Information Technology and Computing field in Western Australia.

The '1962' celebrates the year the first digital stored computer was installed in WA by Professor Dennis Moore AM.

The Prize is funded through the ACS 1962 Trust which was established in 2014 from an original donation of \$25,000 by Dennis Moore.

In 2021 the Trust was altered to allow it to be registered as a charity and for new donations from individuals and organisations to be fully tax deductible. It is now a Deductible Gift Recipient Charity.

Donations can be made directly to the Trust Bank Account (BSB: 06 61 18 Account: 10453899)

or by contacting one of the Trustees of the ACS 1962 Trust:

Michael Paterson: 08 9443 5383

Tony Errington: 0414 248476
